MID-NORTH RESOURCES LIMITED
NOTES TO THE FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2004 and 2003

1 NATURE OF OPERATIONS AND FINANCIAL CONDITION OF THE COMPANY

Mid-North Resources Limited is a TSX Venture Exchange listed public company. The Company currently has interests in mining claims situated in the Provinces of Manitoba and Saskatchewan and the State of Nevada and intends to maintain and explore its mining claims directly and through joint ventures.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to a going concern. The ability of the Company to continue as a going concern is dependent on it raising the required capital to proceed with its operational plans and subsequently obtain profitable operations. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

2. SIGNIFICANT ACCOUNTING POLICIES

In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. The significant accounting policies are as follows:

Financial Instruments

Financial instruments of the Company consist mainly of the cash, accounts payable and accrued liabilities, accrued interest payable, notes payable and amounts due to related parties. As at December 31, 2003 and 2004, there are no significant differences between the carrying values of these amounts and their estimated market values.

Equipment

Equipment is stated at cost less accumulated amortization. Amortization is recorded on the declining balance basis at rates designed to amortize the cost of the equipment over the estimated useful lives based on the following annual rates:

Computer equipment	30%
Office equipment	20%
Display equipment	20%

Mining Claims and Deferred Expenses

Mining claims and deferred expenses are valued at cost less option payments and exploration grants received. The amounts do not necessarily reflect present or future values.

Deferred expenses relate to exploration of mining claims and will be deferred until the properties are brought into production, at which time they will be amortized on a unit of production basis or until the properties are sold or abandoned, at which time the asset will be written off.

MID-NORTH RESOURCES LIMITED
NOTES TO THE FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2004 and 2003

2. SIGNIFICANT ACCOUNTING POLICIES CON'T.

Mining Claims and Deferred Expenses con't.

Administrative expenses which are considered to be wholly related to the acquisition and exploration of properties have been capitalized as part of deferred costs.

The mining claims and deferred expenses are reviewed by management for impairment whenever events or changes in circumstances indicated that the carrying amount may not be recoverable. Recovery of deferred expenses is contingent upon either the Company's identifying mineral reserves in commercial quantities and bringing such reserves into profitable production or the profitable disposition of mineral leases.

Asset Retirement Obligations

The fair value of legal obligations associated with the retirement of property and equipment are recorded in the period the asset is put into use, with a corresponding increase to the carrying amount of the related asset. The liability is adjusted over time for changes in the fair value of the liability through charges to the depletion and depreciation expense. The costs capitalized to the related assets are amortized to earnings in a manner consistent with the depletion and depreciation of the underlying asset. At this point in time, no asset retirement obligation have been set up as the total cost estimated by management is not material.

Stock-based Compensation Plan

The Company has a stock-based compensation plan, which is described in Note 8. The Company records a compensation expense over the vesting period based on the fair value of options granted to directors.

Loss per Share

The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method, the dilutive effect on loss per share is recognized on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds would be used to purchase common shares at the average market price during the year. Basic loss per share is calculated using the weighted average number of shares outstanding during the year. Existing stock options and share purchase warrants have not been included in the computation of diluted loss per share because to do so would be anti-dilutive.

YEARS ENDED DECEMBER 31, 2004 and 2003

2. SIGNIFICANT ACCOUNTING POLICIES CON'T.

Use of Estimates

The preparation of financial statements, in conformity with Canadian generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of the revenue and expenses during the reporting years. Actual results could differ from those estimated.

3. ACCOUNTING CHANGES

Stock-Based Compensation Plan

Effective January 1, 2004, the Company adopted the fair value based method of accounting for stock-based compensation as required by the CICA Handbook. The fair value of the options were determined on the date of the grant using the Black-Scholes option pricing model with the following weighted average:

Risk free interest rate	5.1%
Expected life	5 years
Expected volatility	63%
Expected dividends	\$ Nil

The accounting change has been applied retroactively and the financial statements for the years ended December 31, 2002 and 2003 have been restated. The effect of this change was to:

- i. increase the net loss for the year ended December 31, 2002 by \$11,000 for a net loss of \$110,994,
 - ii. increase the contributed surplus at December 31, 2003 by \$11,000, and
 - iii. increase the net loss of the year ended December 31, 2004 by \$29,250 for a net loss of \$134,100.
- The contributed surplus balance at December 31, 2002 and 2003 was \$11,000 and at December 31, 2004 was \$40,250.

Asset Retirement Obligations

Effective January 1, 2004, the Company retroactively adopted the new section in the CICA Handbook with respect to asset retirement obligations. This standard focuses on the recognition and measurement of liabilities related to legal obligations associated with the retirement of equipment. Under this standard, these obligations are initially measured at fair value and subsequently adjusted for the accretion of discount and any changes in the underlying cash flows. The asset retirement cost is to be capitalized to the related asset and amortized into earnings over time. Adoption of this standard has not affected the Company's financial statements.
