

## **Bison Gold Resources Inc. Exploration Update 2014**

Toronto, Ontario--(Newsfile Corp. - February 3, 2014) - Bison Gold Resources Inc. (TSXV: BGE) ("Bison Gold" or the "Company") is pleased to provide an update on its anticipated 2014 exploration program.

Bison Gold is currently evaluating multiple exploration options for 2014 and undergoing an intensive geological review of its 100% owned Central Manitoba property (the "CM Property"). The goal of which is to establish an optimized technical program, given a limited budget, to maximize the value and potential of the CM Property.

Specifically, Bison Gold technical personnel are scrutinizing:

1. additional drilling to enhance and upgrade the inferred, near surface and high-grade 331,000 ounce gold resource on the Ogama-Rockland zone;
2. the potential for the Eldorado zone to add significant resources to the Central Manitoba portfolio;
3. the Ross River Pluton claims for potential high value new gold resource discoveries; and
4. the potential for the historic Central Manitoba mine gold structures to host substantial gold mineralization at depth. During mining operations from 1927 to 1937 the Central Manitoba trend historically produced 160,034 ounces of gold from less than 280 meters depth at a grade of 12.6 g Au/t.

All exploration activities for Bison Gold are under the supervision and guidance of David C. Benson, P.Geo, a Qualified Person under NI 43-101. Mr. Benson has reviewed the technical portions of this news release.

### **About Bison Gold**

Bison Gold is a Canadian public company listed on the TSX Venture Exchange. Bison Gold is focused on gold exploration with property assets in Manitoba, Canada. The flagship property, Central Manitoba, is historically the second largest gold producer in the prolific Rice Lake Greenstone Belt after San Gold Corp.'s Rice Lake Mining Operations. Further details can be found on Bison Gold's website at [www.bisongold.com](http://www.bisongold.com).

We seek safe harbour. This news release contains forward-looking statements regarding the timing and content of upcoming programs and may be subject to regulatory approval. Actual results may differ materially from those currently anticipated in such statements. Without limitation, statements regarding potential mineralization and resources, exploration results, and future plans and objectives of the Company are forward looking statements that involve various risks. The following are important factors that could cause the Company's actual results to differ materially from those expressed or implied by such forward looking statements: changes in the world wide price of mineral commodities, general market conditions, risks inherent in mineral exploration, risks associated with development, construction and mining operations, the uncertainty of future profitability and the uncertainty of access to additional capital. There can be no assurance that forward-looking statements will prove to be accurate as actual results and future events may differ materially from those anticipated in such statements. Bison undertakes no obligation to update such

forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on such forward-looking statements.
